

N757 NYSTAD SAUNA SCENT GIFTBOX

The beautiful gift box contains three different steam scents, birch, lavender and mint.

When heating your sauna, put the scent bag into a bowl (or bucket), and add hot water to fill the bowl. Allow the bag's contents to be infused into the water until the sauna has been heated for about 20 minutes. In our experience, the sauna scent works best as a moderate heat, circa 75 °C. Throw a scoop of water on the stove at regular intervals, relax, and take in all the freshness.

- Ingredients: Dried birch leaf
- Pack of 3 steam fragrances
- Made in Finland
