BUCKET+LADLE

KOLO Bucket+Ladle are inseparable and that is why they come in the same package. The ladle functions as the bucket's handle, and without the bucket the ladle would have nowhere to rest. They are not designed to make your sauna experience unforgettable, nor do they glow in the dark or have a special scent. What we do guarantee, however, is that our bucket won't leak and our ladle will bear the weight.

- Aluminum, ladle handle is made of bamboo
- Bucket dimensions: height 20 cm and diameter 24 cm
- Bucket capacity: 5 litres
- Ladle dimensions: height 4,5 cm, diameter 9,5 cm, length 41 cm
